### Description:

Metal stamping is a manufacturing process used to convert flat metal sheets into specific shapes. It is a complex process that can include a number of metal forming techniques-blanking, punching, bending and piercing etc.

### Advantage:

Stamping is suitable for mass, complex parts production. More specifically, it offers:

Complex forms, such contours

High volumes(from thousands to millions of parts per year)

Processes such as fineblacking allow for forming of thick metal sheets.

Low cost-per-piece price.

### Application:

Our metal stamping industries include, but aren't limited to: Automotive, Aerospace, and Medical.

### Company profile:

C&A Industrial Component Ltd. Is a China based manufacturer of custom made metal components, hardware, fittings, valves, PVC products, etc.

We have over 20 manufacturing facilities that we collaborate with in China. Manufacturing process: pressure die casting, machining, stamping and etc.

Most of the facilities are Certified with ISO9001, TS16949, and etc.
