Description:

Metal stamping is a manufacturing process used to convert flat metal sheets into specific shapes. It is a complex process that can include a number of metal forming techniques-blanking, punching, bending and piercing etc.

Advantage:

Stamping is suitable for mass, complex parts production. More specifically, it offers:

Complex forms, such contours

High volumes(from thousands to millions of parts per year)

Processes such as fineblanking allow for forming of thick metal sheets.

Low cost-per-piece price.

Application:

Automotive Stampings

Building Products

Solar BOS (balance of system) Components

LED Lighting

Electric vehicle EV Components
