

## Titanium Stamped Sheet Metal Parts Process Hydraulic Filter Mounting Base Aluminum Bracket

Our Product Introduction

### Basic Information

- Place of Origin: China
- Certification: ISO9001:2015
- Minimum Order Quantity: 3000
- Packaging Details: Carton or wooden case
- Delivery Time: 35 days
- Payment Terms: T/T, Paypal
- Supply Ability: 1000000

### Product Specification

- Material: Aluminium
- Finish: Anodization
- Tolerance: +/- 1mm
- OEM: Available
- Color: Black
- Highlight: stamped sheet metal parts,  
titanium sheet metal parts,  
sheet metal parts process

## Product Description

### Hydraulic Filter Mounting Base Aluminum Bracket:

|                   |  |
|-------------------|--|
| Name              | Hydraulic Filter Mounting Base Aluminium Bracket |
| Material          | Aluminium  |
| Surface treatment | Non  |
| Tolerance         | +/- 1 mm   |
| Weight            | 300g   |
| Process           | Sheet Metal                                      |
| Certificate       | ISO9001:2015                                     |
| OEM               | Available  |

#### Description:

Sheet metal parts are thin, flat pieces of metal that undergo various fabrication processes to achieve specific shapes and sizes. These processes primarily involve cutting, bending, and assembling the metal sheets to form the desired component. The metals commonly used for sheet metal parts include steel, aluminium, copper, brass, and stainless steel, each chosen for its unique properties and suitability for particular applications.

#### Advantage:

1. Sheet metal material are also capable of holding high-pressure levels, with the added ability to resist corrosion and degradation resulting from exposure to sun, water, moisture, and corrosion in all types of environments.
2. Sheet metal components exhibit a relatively low weight when compared to alternative materials such as solid metal blocks or castings.
3. Sheet metal parts, especially these made from materials like steel or aluminium, are highly recyclable. These parts can be recycled and reused to produce new sheet metal components, reducing environmental impact and promoting sustainability.

#### Application:

Custom sheet metal manufacturing is used in a variety of applications such as aerospace, automotive, medical, consumer products, scientific instruments, and electronic devices. Sheet metal manufacturing can be customized to create a wide range of parts, including brackets, covers, frames, enclosures, and housings.

#### Company profile:

C&A Industrial Component Ltd. is a China-based manufacturer of custom-made metal components, hardware, fittings, valves, PVC products, etc.

We have over 20 manufacturing facilities that we collaborate with in China. Manufacturing process: pressure die casting, machining, stamping and etc.

Most of the facilities are Certified with ISO9001, TS16949, and etc.

Our manufacturing facilities are located in Zhejiang area and Jiangsu area with a USA sales office for our North American Customers.
