

Cnc Machining Part Cnc Turning Machine Parts Custom Steel Machinery Motorcycle Parts

Our Product Introduction

Basic Information

- Place of Origin: China
- Certification: ISO9001:2015
- Minimum Order Quantity: 1000pcs
- Price: negotiable
- Packaging Details: Carton and wooden case
- Delivery Time: 30-35 Days
- Payment Terms: T/T, Paypal
- Supply Ability: 10000pcs

Product Specification

- Material: Carbon Steel
- Surface: Non
- Tolerance: +/-0.05mm
- Weight: 200g/pc
- Process: Machining
- Color: Natural
- Certification: ISO9001:2015
- OEM: Available
- Highlight: **cnc machining part, turning machine parts,
cnc turning machine parts**

Product Description

Custom Steel Machinery Turning Motorcycle Parts

Name	Custom Steel Machinery Turning Motorcycle Parts
Material	Carbon steel
Surface treatment	Non
Tolerance	+/-0.05mm
Process	Machining
Certificate	ISO9001:2015
OEM	Available
Color	Natural

Description:

Machining generally describes a manufacturing process in which a worker uses sharp cutting tools to remove excess material from a parts in order to create a desirable new shape. Casting, forgings, extrusions, bar stock and even raw materials can all provide substrates for the process of machining. Typically, machining constitutes a secondary operation. It usually involves cutting away and discarding a portion of the material.

Material for machining:

Metal:Stainless steel, carbon steel Q235, aluminium 6061, brass, and etc.

Plastic: ABS,PC, POM and HDPE.

Advantage:

1.In order to evaluate a new design, it is relatively easy to make prototype parts. there is no investment in tools and molds needed.

The total cost of machined prototypes is low.

2. Tacking in account some basic design for fabricating parts, the freedom of designing machined parts is huge. More specific, it allows all kinds of shapes, even curved surface.

3.Machining represents a highly cost-effective process for finishing some limited production runs. while generally more labor intensive than some other processes, it usually contributes value to the finished goods

Application:

Part machining provides useful components to just about every industry out there. The high precision of CNC production machining makes CNC machining cost-effective without compromising quality for a wide variety of applications, including Aerospace, Automotive, Medical devices, and Oil and gas.

Company profile:

C&A Industrial Component Ltd. Is a China based manufacturer of custom made metal components, hardware, fittings, valves, PVC products, etc.

We have over 20 manufacturing facilities that we collaborate with in China. Manufacturing process: pressure die casting, machining, stamping and etc.

Most of the facilities are Certified with ISO9001, TS16949, and etc.

Our manufacturing facilities are located in Zhejiang area and Jiangsu area with a USA sales office for our North American Customers.
