Description:

The forging process minimizes internal defects such as porosity and inclusions, resulting in parts with improved structural integrity and performance.

Advantages:

Forged parts excel in strength and durability due to the forging process. Under pressure and shaping, metal's molecular structure transforms, yielding robust components that withstand stress and loads. From machinery to aerospace, forged parts prove their resilience.

Application:

Forged parts is widely used in mechanisms and machines wherever a components requires high strength.

Company Profile:

C&A Industrial Component Ltd. Is a China based manufacturer of custom made metal components, hardware, fittings, valves, PVC products, etc.

We have over 20 manufacturing facilities that we collaborate with in China. Manufacturing process: pressure die casting, machining, stamping and etc.

Most of the facilities are Certified with ISO9001, TS16949, and etc.
